

Business Continuity Management (BCM) Policy

As a semiconductor foundry which provides industry leading solutions, our goals are offering technologies with high quality and high reliabilities, maintaining production system, ensuring business continuity, and building trust from customers and society.

【Fundamental Principles】

▪ Protection of Human Life

Our first priority is to ensure the safety of employees, their families, visitors, partner companies, and local residents.

▪ Prevention of Secondary Disaster

We will minimize property damage and prevent secondary disasters in the event of an incident

▪ Protection of Our Customers' Business

We will resume operations at the earliest point to ensure our customers' business activities in the event of an incident.

▪ Cooperation and Coordination with local communities

We will cooperate with local communities and provide mutual support during both normal times and disasters.

【Code of Conduct】

Act in accordance with fundamental policy.

- Conduct impact analysis and risk assessment on business operations, and establish and implement BCM targets in response to changing business environment.
- Keep promise with customers and comply with laws and regulations related to Business Continuity Management System (BCMS).
- We will strive to continuously improve BCMS performance effectively.
